

Chose the segment you want to change, and then press the open event editor

Time	Duration	Event Type		
001-01-00-01		clefchange		
001-01-00-02		controller		
001-01-00-03		controller		
001-01-00-04		controller	91	120
001-01-00-05		controller	32	0
001-01-00-06		programchange	1	

The number 32 is the controller the take care of the bank select options. It's under type(data 1)

and the number 0 is the selections of the bank. under the Value (Data2)

Value 0, is the GM standard, for my synth, bank 4 is the drum bank.
