Misc

Preset Name: (default)

Server

Server Path: /usr/bin/jackd

Driver: oss

Here you can click to get a drop down menu over different recording devices, so here you can choose to use what ever you want, sins i using UA-25, i pick that on.

Here you can choose what playback device you want to use, for my part i use the UA-25 for the quality record and use the build in soundcard, to play back the sound

First click on setup to get the Dialog box up

Interface: (default)

Dither: None

Audio: Duplex

Input Device: hw:0

Output Device: hw:0

Input Channels: 0

Output Channels: 0

Input Latency: 0

Output Latency: 0

After you change, be sure to stop jack and start it again, you need to restart rosegarden as well

OK

Cancel
